- [NO] Can Sell Resell Rights

General Information

This mod allows members to add Gifts from programs they own. Gifts are offers which marketers use to increase their lists, offering something for free, like credit packages, upgrades, eBooks, etc. These Gifts will be shown to all members in your site, organized in categories. You can setup how many gifts each member level can add, so it can be used as an extra benefit for your upgraded members.

When creating a gift, the member can upload a 125x125 image, enter a title, description, target URL and contact information. All gifts need to be approved by you. Approved gifts are shown to all members

organized in categories defined by you. Gifts are removed automatically if members lose their membership level

Important: after you have defined settings (see next section) you need to enable the custom pages which will be shown to members in the member area. Go to "Site Design" -> "Custom Pages" and activate the pages "My Gifts" and "View Gifts". Once enabled, these two pages will be available in the member area menu.

Member Gift Mod Settings

Login to your LFMTE control panel and go to Site Ads→ Gifts

In the general settings define how many gifts to show per page. Define how many gifts each member level can add. The recommendation is to enable this feature for upgraded levels, so free members will have 0 and upgraded members 1 or more gifts, but offering 1 gift slot to free members and more than 2 to upgraded members is also an option.

View Gifts

In this section you can see the list of gifts added by all members, with functions to search by different fields and to filter by status (All, Enabled, Suspended and Pending Approved).

The list of gifts show all information entered by the gift owner (including image), you can review this information and approve or suspend the gift. The column "Last Verification" shows you the last time this gift was reviewed. To review a gift click on the target url link

View Categories

Gifts are organized in categories, like Ebooks, Audio/Video, Traffic Exchanges, Viral Mailers and Software. You can add or remove categories from this list.
